Utilities Complaint Form

life in This Rural area. We are the retired, from Military, from teaching etc. retired from society. We live day to day and for some pay check to pay check, social security, odd jobs etc. Raising families for some animals for others. As a whole taking individual responsibility for are own life style. But when someone comes in and BULLIES us to change that is just Wrong.

The following will be the time code on video as to what was said by Mr. Crocket Johnson Utilities proceeded by what i know to be the truth at this time along with URL of archived web pages for verification.

00:13:00 statement;

Discovery; Mr Johnson is asking for 2 million liability insurance for San Tan Water company. completely unreasonable ..alredy covered under regular auto insurance. does this mean the pesonal haulers need this aswell ?

Further more, most, not all ..trailers that are used by the indavidual..in some cases do not have tags nore were required to have tags they are considered Farm equipment. that was never ment to be on main roads such as hunt hwy . these are in some cases the coustomers that is Force to use Road Runner. many trailers can easily make a 5 mile round trip at 25 mph. but not a 50 mile trip. Including the elderly that putt along at 10 mph on the back roads.

00:13:37 statment

Discovery; Mr Johnson was and has been completely aware of all accounts. They issued pin

numbers and sent bills monthly. Lets clearly define the waters haulers and water transite.

definitions for these purposes. Water hauler the individual, the resident, for livestock, garden, potable for in home use. Water Transit. The company or business who hauls water to the individual, the residence. San Tan Water transit has been in exsistance since 2010 created from the privious owner named Jo off of Thompson to help fill a void. most of us as a community help are neighbors when in need, like if there trailer gets a flat or cant haul for themselves they borrow someone who can, simple. Nick Myers moved to the neighborhood after retireing from the teck world and became an entrapnoure.

<https://www.facebook.com/teknoismurf> 2013 w Desert Train Express. Then in 2014 he bought the

San Tan Water Transit

<http://www.santanwatercompany.net/>

on this page you can read the history. /johnson utilitis and standpipe issues

00:13:47 Statement

Discovery; before the standpipe was open on Edwards the majority of the water haulers were using Queen Creek Water est. 1967 standpipe, located Ellsworth and Octillo which was a 20 mile round trip for most. the construction Standpipe refered to by Mr Johnson was located on Hunt hwy. as shown on this map from Queen Creek archives from town coucil meeings.

<http://www.queencreek.org/departments/utilities/water/local-water-providers>.

When the standpipe on edwards was open it was promoted in the neighborhood as a closer sorce if potable water with a flyer distributed in the mail boxes Stating "Water for less no Monthly Fees" as the customer base grew smaller for Queen Creek Water they directed the remaining 30 customers or so to Johnson Utilities. stated here from the archives Queen creek water council.

<http://www.queencreek.org/about-us/search?q=johnson%20utilities%20standpipe>

There is sooo much more however i am having problems w my internet connection but wanted to get something to you the Bulling must stop as well as the threat of lawsuite for slander if you say your opion.
